

Gretchen Everett
Furniture | Drapery Hardware

Sparked by a desire for unique, clean, and simple drapery hardware, Gretchen Everett has dedicated nearly twenty years to creating innovative designs for the discerning clientele of her namesake studio. Combining her distinctive vision with her early experience in the fashion industry, Gretchen partners with a network of artisans from across the country to create hand-cut, hand-polished, drapery hardware and occasional tables for some of the most beautiful spaces globally. Washington, DC based and New Orleans born, her design couples modern simplicity with time honored principles for beautiful living.

Custom Collaborations

We collaborate with designers and artists to create unique pieces for sublime spaces. Delivering furniture and hardware that is beautiful, functional, and made to stand the test of time.

Our Cantilever side table customized with an inlay of Bark Composition #581 by artist Dagmara Weinberg.

Custom Acrylic Hardware designed in collaboration with David Collins Studios, UK for the Kips Bay Show House 2016; a dramatic play on positive and negative space using black and clear acrylic.

The Details

All pieces are made to order

Allow 4-6 weeks for delivery of all brass and iron pieces. 5-8 weeks for all plated finishes.

Prices subject to change.

Hardware Design and Structure

Bracket projections are 3" to back of rod unless otherwise indicated.

We recommend bracketing the rectangular acrylic rods every 5' for stability.

We recommend bracketing the round acrylic rods every 4' for stability.

Rods can be fabricated to any length although splices may be required for shipping.

We use only the finest grade acrylic available to the market. To help ensure your Gretchen Everett acrylic hardware is enjoyed for years, we suggest regular dusting. Use a lint free cloth and only cleaning products rated for acrylic. Each order comes complete with a complimentary acrylic cleaning kit. Do not use glass cleaner. Drapery rod silicone spray is safe for use with our acrylic to help your drapery move smoothly.

Acrylic is a more malleable product than iron, steel or wood. We caution our clients against hanging extremely heavy or long drapery without additional brackets for support.

Finishes

Custom Finishes are available. Custom finishes require pre-production sample approval.

Lacquer is included on antique brass, nickel, and copper finishes and available on all other finishes for an additional charge.

Lacquer will slow the natural patina process. We recommend lacquering hardware being placed in high humidity regions.
